## BP Oil Spill: NOAA Modifies Commercial and Recreational Fishing Closure in the Oil-Affected Portions of the Gulf of Mexico

### Updated Closure

Current revisions to the closure, described below, will be effective on **May 14, 2010 at 6 p.m. eastern time (5 p.m. central time)**. All commercial and recreational fishing including catch and release is prohibited in the closed area; however, transit through the area is allowed.

lat. and 90°25' W. long.; thence northwesterly to 28°53' N and 91° W; thence northerly to the point where 91° W. long. intersects with the 3 nautical mile Louisiana state boundary; thence along the seaward limit of Louisiana's waters. The closure measures 19,377 sq mi (50,187 sq km), which is 8 percent of the Gulf of Mexico exclusive economic zone. The majority of federal waters in the Gulf of Mexico are open to commercial and recreational fishing.

Modeling and mapping the actual and projected spill area is not an exact science. NOAA Fisheries Service strongly advises fishermen not to fish in areas where oil or oil sheens (very thin layers of floating oil) are present, even if those areas are not currently closed to fishing.
